WE PROVIDE LAGOON CLEANING SERVICES

Wastewater lagoons and storage ponds are vital to agricultural, industrial and commercial businesses, including municipal water systems, manure pits, sedimentation ponds, lime sludge lagoons, incinerator ash impoundments, and coal fine ponds. These lagoons need to be maintained on a regular basis. After years of operation, sludge and debris build up needs to be removed.

Lagoons frequently fill up with silt, sludge, and other organic materials like animal/waterfowl waste and vegetation. Dirty lagoons can cause numerous operational issues, so they must be routinely cleaned and maintained. How do you know when your lagoon needs to be cleaned? A good sign is overflow, algae and cattail growth, and foul odors.

Lagoon Cleaning

At A&D Environmental, we know time is money. A&D has the manpower and equipment to get the work done within your tight deadlines. We provide:

- Lagoon draining
- Robotic sludge dredging, removal and drying
- Sludge excavation, dewatering and stabilization
- Digester Cleaning
- Piping, pumps and lagoon appurtenance cleaning
- Biosolids management
- Liner installation and/or repair
- Backfilling and compaction
- Final Lagoon Closure
- Wastewater and sludge profiling
- Waste transportation to appropriate landfill, land application or other disposal outlet.

Who can we help:

- Municipal Wastewater Treatment Facilities
- Meat and Poultry Processing
- Alcohol, Beer, Starch Production Plants
- Pulp and Paper Manufacturers
- Dairy and Pig Farms
- Organic Chemical Production Plants
- Food and Drink Processing Facilities (dairy, vegetable oil, fruits and vegetables, canneries, juice making)
- General Contractors
- Power Companies

Call A&D today for a quote on your lagoon and pond maintenance needs.
